Associate Prof. Mukesh Kumar Chalise, Ph. D. (Ecology)
Associate Prof. Surya Ratna Gubhaju, Ph. D. (Fish & Fisheries)
Lecturer Ramesh Shrestha, Ph. D. (Ecology)
Lecturer Hari Prasad Sharma, M. Sc. (Ecology)

Editorial

There are not many journals in Nepal, certainly not many of Zoology, that include the valuable researches carried out based on Nepal. "Nepalese Journal of Zoology" (NJZ) is the milestone in the Zoological history of Nepal and is the common platform for all the researchers. This first volume of NJZ is the initiation of Central Department of Zoology (CDZ), Tribhuvan University with the active participation of all the enrolled students and brilliant insight and suggestions from its faculty members.

NJZ will be published annually from CDZ, TU with the objective of bringing the findings of valuable researches to the readers that are concerned with the bio-diversity conservation, environmental protection and public health and animal health related issues. It is open to all the contributions dealing with the animal science.

The editorial board of NJZ is formed from the Master's level students enrolled in CDZ, TU who are the learners but not the experts in the field of research and writing scientific papers. We have tried our best to maintain the quality of scientific journal with the additional support from our advisors. Besides the editorial board and the advisors, we also have a list of experts whom we consult for peer-reviewing manuscripts and only those articles that are recommended by the reviewers are published in NJZ. We will be more selective to accept the paper, size of the coming volume of the journal will be increased, other texts including advertisements and well-wishes will be excluded and we are planning to place the abstracts of major papers in the website of NJZ which is in due course of its hosting.

The editorial board emphasized the publication of simple, easily understandable but valuable and worthy articles. The opinions and interpretations expressed in the articles are the personal opinions of the researchers and do not necessarily reflect the views of the publisher and editors, or of any institution with which the researcher may be associated. The Editorial Board does not guarantee the accuracy of data and the information included in the articles and accepts no responsibility, whatsoever, for any consequences of their use. The editorial board of NJZ welcomes the critical comments and suggestions from all sectors for its quality improvement and sustainability.

Laxman Khanal
Chief Editor

Acknowledgements

The editorial board of Nepalese Journal of Zoology is grateful to the Head of Department, Central Department of Zoology for his encouragement, suggestions and financial and technical assistance in the publication of this journal. We are greatly indebted to all the honourable advisors of NJZ and faculty members of CDZ for their abiding interest and moral support in the publication of this journal.

We would like to acknowledge Professor Karan Bahadur Shah and Associate Professor Dr. Madan Koirala for peer-reviewing of the articles. Our thanks are due to Mr. Ashok Bahadur Bam, Mr. Pushpa Acharya, Mr. C. P. Choudhary and others who initiated the work and participated actively in the earlier days of publication of NJZ.

The editorial board expresses its special thanks to the acting committee of Zoological Students' Association of Nepal (ZOOSAN) for its continuous support in this publication. We are thankful to all the colleagues of Central Department of Zoology for their moral support in this work. Our thanks are due to Mr. Prakash Bastakoti of 'Manasalu Printers', Nayabazar, Kathmandu for the effort that he made in complete computer settings and printing of this Journal.

We are thankful to the researchers who trusted us and provided the manuscript of their valuable research for publication in this journal. Our special thanks are due to all the advertisers, supporters, well-wishers and readers for their contribution. At this glorious moment we promise to all that the forthcoming volumes of "Nepalese Journal of Zoology" will be further better and regular.
