Tribhuvan University
Institute of Science & Technology
B.Sc. Zoology Course of Study

Course Title : Non-chordata and Protochordata
Course No: Zoo101 **Full Marks**: 100
Nature of the Course: Theory **Pass Marks**: 35
Lecture: 150 **Year** : 1

Course Objectives:
At the end of course students will be able to:
- Classify the non-chordates with their examples.
- Know the functional anatomy of typical representative/s of each Phylum.
- Understand polymorphism, parasitism, social life etc. of some non-chordates.
- Know the economic importance of non-chordate animals.
- Know the structures, affinities and development of Protochordates.

Group A : Lower Non-chordata

Taxonomy: Concept, trends, species, keys, characters, procedures and significance of taxonomy. ICZN. Phylogeny of invertebrates. Classification of Protozoa, Porifera, Coelenterata, Platyhelminthes, Aschelminthes and Annelida with characters and examples. **(10 hrs.)**

Protozoa: Status of protozoa and concept of portista. Locomotion, nutrition, reproduction and osmoregulation in protozoa. Structure and reproduction of *Vorticella*. Structure, life cycle, pathogenicity and control measures of *Leishmania donovani*, *Entamoeba histolytica and Trichomonas vaginalis*. Radiolaria and suctoria. **(14 hrs.)**

Porifera: Metazoa and their origin. Organization of bilateria. Structure, reproduction of sponges and embryogeny of *Scypha*. Canal and skeletal systems. Origin and affinities. Economic importance of Porifera. **(7 hrs.)**

Coelenterata: Structure, reproduction and development of *Obelia*. Polymorphism. Distribution, types and formation of corals and coral reefs. Coral and dinoflagellate symbiosis and coral bleaching. Human intrusion in coral reefs. Economic importance of Coelenterates. **(12 hrs.)**

Platyhelminthes: Body wall, digestive, excretory, reproductive and nervous systems, & sense organs. Structure, life cycle, pathogenicity and control measures of *Fasciola hepatica, Taenia solium* and *Echinococcus granulosus*. Morphological and physiological adaptations of helminth parasites. Larval forms. **(12 hrs.)**

Aschelminthes: Body wall, digestive, excretory and reproductive and nervous systems, & sense organs. Structure, life cycle, pathogenicity and control measures of *Ancylostoma duodenale, Enterobius vermicularis*, *Wuchereria bancrofti* and phyto-nematode (*Meloidogyne incognita*). Economic importance of Aschelminthes. **(10 hrs.)**

Annelida: Coelom and Nephridia in Annelida. Structure, organ systems, life cycle and parasitic adaptations of *Hirudinaria granulosa*. Introduction to vermicomposting. Classification, structure and affinities of Archiannelida. Adaptive radiation in Polychaeta. Economic importance of annelids. **(10 hrs.)**

Group B: Higher Non-chordata and Protochordata

Classification of Arthropoda, Mollusca, Echinodermata and Protochordata with characters and examples. **(6 hrs.)**

Arthropoda: Body wall, digestive, excretory, reproductive and nervous systems, and sense organs. Organ systems of freshwater prawn (*Palaeomon*). Structure, life history and economic importance of *Periplaneta americana*, *Phlebotomus argentipus*, *Culex quinquefasciatus, Aedes aegypti* and *Sitophilus oryzae*. Mouthparts of insects. Metamorphism in insects. Social behavior of insects. Characteristics and affinities of Onychophora. Insect Hormones and Pheromones. Economic importance of Arthropods**.(25 hrs.)**

Mollusca: Foot and Shells in Mollusca. Structure and organ systems of Apple Snail (*Pila globosa),* fresh water mussel: *Lamellidens* (=*Unio*). Pearl and its formation. Dispersal, damage and control measures of African Giant Land Snail (*Lissachatina fulica*). Torsion and detorsion in Gastropoda. Economic importance of molluscs. Diversity of molluscs in Nepal. **(22 hrs.)**

Echinodermata: Origin and Evolution Structure, organ systems and development of *Asterias*. Larval forms in Echinodermata. Water vascular system. **(8 hrs.)**

Minor Phyla: Salient features of Acanthocephala, Nemartina, Rotifera, Gastroitricha, Mesozoa and Ctenophora. **(5 hrs.)**

Protochordata: Origin and Evolution. Structure, organ systems and affinities of *Balanoglossus, Herdmania and Branchiostoma*. Development of *Herdmania*. (9 **hrs.)**

*****

Tribhuvan University
Institute of Science & Technology
B.Sc. Zoology Course of Study

Course Title : Non-chordata and Protochordata
Course No: Zoo102 **Full Marks**: 50
Nature of the Course: Pratical **Pass Marks**: 20
Year : 1

Course Objectives:
At the end of this course students will be able to:
- Identify representatives of different Phyla of Non-chordates and Protochordates.
- Know the pathogenic animals; histology of different organs of non-chordate animals.
- Know the structure of mouth-parts of insects and structure of larval forms of different arthropods.
- Know the basic differences in general anatomy of different animals.

Techniques: Collection and preservation of Non-chordates.
Taxonomy: Identification of Non-chordates (collection, museum specimens and permanent slides).
Culture: Protozoan culture.
Permanent histological slides: Sections of *Fasciola, Ascaris, Hirudinaria, Balanoglosus* and *Amphioxus*.

Slide preparations:
1. Temporary slide preparation:
   Any cultured organism, Statocyst of prawn, Jaw of snail/slug, Jaw of *Hirudinaria,* Mosquito larva and Nematodes of animals.
2. Permanent slide preparation:
   Radula of snail; mosquito larva; mouthparts of mosquitoes, cockroach, honeybee, house fly and butterfly; *Daphnia/Cyclops/Cypris*.

Morphology and anatomy (Dissection):
1. Leech – General Anatomy, Excretory and Reproductive.
2. Prawn - Appendages, Nervous system and Digestive organs.
3. Cockroach – General anatomy, digestive organs, nervous system and reproductive organs
4. Apple snail (*Pila*) – General anatomy and Nervous system.

Case study and report writing (any one)
i) Medical diseases
ii) Veterinary diseases
iii) Agriculture pests
iv) Faunal survey/ Field trip (one day).

Practical note book preparation as regular study.
